| TABLE OF CONTENTS | |
|-------------------| |
Better by design

When we developed our Proxima line of surgical gowns and drapes we went straight to the people who use them. We spoke to O.R. professionals across the country to get a sense of what features they liked and disliked about other surgical gowns and drapes, and then worked to develop Proxima — an innovative line you can use with confidence.

Since then, we’ve continued to listen to Clinician feedback to introduce new features. Whether it’s a simple change like adding more velcro-style lineholders to a drape, or introducing the superb combination of comfort and protection in our Aurora gowns, we’ve strived to keep listening and improving the Proxima line to help make your job easier.

Proxima gowns – the power of choice

Medline has worked to bring you surgical gowns with the latest fabric technologies.

We recognize that your O.R. team may have different preferences in a surgical gown. That’s why Proxima gowns are available in 4 materials: Aurora™, Eclipse®, Boundary-SMS and Prevention.

Each of these gowns feature a different fabric that has its own unique qualities. However, there are a set of benefits that all these gowns share.

All Proxima gowns are cut wider in the chest and sleeves for a better fit. Instead of using snaps, our gowns feature an adjustable velcro-style neck closure. This allows the neckline to easily adjust to a wide variety of people, while also helping to prevent gapping in the front which serves as additional protection against fluids.

You can check if you want!

The length of our Proxima surgical gowns is measured from centre front neckline. All gowns are available in 5 different European sizes: S, M, L, XL, XXL and 3 different versions: non-reinforced, fabric reinforced and poly reinforced.

No other manufacturer offers this kind of choice.

Attention:

Our gowns have sleeves which are bonded or sonically-sealed instead of stitched.
Proxima drapes – the broadest line in the market
No one offers a more extensive surgical drape line than Medline. Proxima drapes feature DuPont™ Softesse™ Medical Fabric, we call ECLIPSE an industry standard for more than 25 years. The fabric gives Proxima drapes their soft, cloth-like feel that conforms easily to the body.

SMS material:
For our Proxima surgical drapes we use high-quality SMS material, which has been proven to be fluid repellent, low linting, strong, tearproof and, above all, breathable. Thanks to this innovative SMS technology, Medline surgical gowns and drapes provide high levels of protection against blood and fluids while offering the highest comfort.

Packed with features to help make your job easier. Proxima drapes feature a number of unique benefits that help make draping a little easier:

Velcro-style line holders
Proxima drapes feature velcro-style line holders to place surgical lines and help keep them clear of the fenestration. The tabs are offset to make lifting them easy, even when wearing gloves. This is one of the key features suggested to us by clinicians across the country when we developed the Proxima line of drapes.

Larger impervious reinforcement zone
Proxima fenestrations and splits are surrounded with a large impervious reinforcement. This area absorbs fluids and is plastic-backed to make the area impervious to blood and body fluids as well as bacterial transmission. All Proxima reinforced zones pass ASTM F1670 and F1671.

Instrument pad for traction control
The instrument pad on Proxima drapes is a section of open-celled foam that provides a convenient, non-slip area for placing instruments during surgery. The pad is also plastic-backed, making it impervious to fluid transfer.

An “Extra” at Medline
Almost every orthopedic and cardiovascular standard pack features an especially thick and reinforced mayo cover.

The standards
All Proxima drapes and gowns meet and surpass the American as well as the European requirement EN 13795.

All Proxima products are latex free
Keeping you and the patient in mind, all products in the Proxima line are latex free. All of our packaging is clearly labelled with our latex-free symbol.

Premium tape and incise film
We use premium tape and incise film exclusively on all Proxima drapes. Our tape is manually placed flush to the fenestration to help prevent pooling of blood and fluid underneath the drape. Because the tape is placed manually, it allows the tape to be closer to the fenestration compared to other drapes.

Aurora Surgical Gowns

Aurora gowns offer an unbeatable combination of protection and comfort.

**Made with Suprel™ medical fabric from DuPont™**
Suprel medical fabric is based on DuPont’s new Nonwovens Advanced Composite technology. This bi-component fabric is made of polyester (for strength) and polyethylene (for comfort).

**Uncompromising performance**
Aurora gowns offer a high level of protection without compromising comfort. Featuring new fabric technology, Aurora raises the bar for single-use O.R. gowns.

**Breathable and comfortable**
Aurora gowns have a smooth texture that glides easily without catching or grabbing, giving you incredible freedom of movement. Plus, the gown helps to quickly transfer heat away from your body, keeping you cool and comfortable.

**Excellent protection**
For a high level of protection, Aurora gowns are a great choice. The gown’s high hydrostatic head offers superior barrier performance.

**Generous sizing**
Aurora gowns are cut wider through the chest and sleeves for a roomier fit.

**Adjustable neckline**
The Aurora gown features a velcro-style neck closure that allows the neckline to easily adjust to a wide variety of people. In addition, the velcro-style closure helps prevent gapping in the front of the gown to further help protect against fluids.

**Flame resistant**
Aurora gowns meet the Standard for Flammability of Clothing Textiles CPSC 16 CFR Part 1610.

**Low-linting**
Aurora gowns are very low linting, minimizing the risk of introducing particles into the O.R.

Eclipse
Eclipse® Surgical Gowns

Eclipse gowns offer everyday protection and comfort.

**Comfort you can feel**
The first feature you will notice about the Eclipse gown is the way it feels. The soft, cloth-like texture says “comfort” as soon as you put it on. Those who spend much of their day in a surgical gown will appreciate the comfort of Eclipse.

**Generous sizing**
Eclipse gowns are cut wider through the chest and sleeves for a roomier fit.

**Adjustable neckline**
The Eclipse gowns feature a velcro-style neck closure that allows the neckline to easily adjust to a wide variety of people. In addition, the velcro-style closure helps prevent gapping in the front of the gown to further help protect against fluids.

**Made with breathable Softesse™ medical fabric from DuPont™**
For more than 25 years, DuPont Softesse medical fabric has been considered an industry standard for medical gowns and drapes. The fabric features advanced material technology that provides a splash resistant barrier that’s breathable. It keeps you cool and comfortable while you work, helping you feel confident and in control.

**Variety of styles**
Eclipse gowns feature a variety of styles and protection levels including non-reinforced, fabric reinforced and poly reinforced gowns that are also available with breathable sleeves and extra-long sizing.

*ECLIPSE SURGICAL GOWNS, STERILE*

---

The Company of Choice

www.medline.com
Cool-Zone® Surgical Gowns

Cool-Zone gowns offer the ultimate in comfort.

**Stay Cooler**
The back of the Cool-Zone gown features unique comfort panels made of lightweight fluid-repelling fabric that is breathable—allowing body heat to escape.

**Soft and Comfortable**
The front and sleeve areas of the Cool-Zone gown are made of an exceptionally soft, yet fluid repellent fabric which offers superior strength and protection against strikethrough.

**Adjustable neckline**
The Cool-Zone gown features a velcro-style neck closure that easily accommodates various neck sizes for a custom, comfortable fit. Not only are the neck closures easy to use, the heavy velcro assures secure fastening with less chance of accidental opening.

**Bonded Sleeves**
Cool-Zone Gowns feature bonded sleeves (instead of stitched sleeves) for additional protection against strikethrough.

**Variety of Protection Levels**
Cool-Zone gowns are available in, fabric-reinforced and impervious-reinforced styles. Even with the highest level of protection afforded by the impervious reinforced gown, Cool-Zone panels provide that extra level of comfort needed for extended procedures.

**Knit Cuffs**
The soft knit cuffs are not only comfortable, but their length facilitates closed gloving.

Prevention™ Surgical Gowns

Prevention gowns offer the highest level of protection with breathable.

Microporous technology provides best combination of protection and comfort
Offers a high level of protection while providing increased breathability and comfort. Based on microporous film technology, Prevention gowns “breathe,” allowing moisture vapor to escape while preventing transmission of fluids. This is possible because moisture vapor is a thousand times smaller than the smallest viruses.

Sonically-sealed seams prevent strike through
Prevention gowns feature sonically-sealed seams (instead of stitched seams) to prevent strike through where the sleeves are joined to the body of the gown.

Impervious protection
Meets ASTM test for viral penetration (ASTM F1671) and ASTM test for blood penetration (ASTM F1670).

Flame resistant

Generous sizing
Cut wider through the chest and sleeves for a roomier fit. Plus, they’re longer than other surgical gowns to provide a greater area of protection.

Adjustable neckline
Prevention gowns feature a velcro-style neck closure that allows the neckline to easily adjust to a wide variety of people. In addition, the velcro-style closure helps prevent gapping in the front of the gown to further help protect against fluids.

Boundary-SMS Surgical Gowns

Boundary-SMS gowns offer a level of comfort superior to other SMS gowns.

**Better fit and adjustable**
Boundary-SMS gowns are roomier in the chest and sleeves to help provide a better fit. They also feature an adjustable velcro-style neck closure.

**Flame resistant**
Boundary-SMS gowns are resistant to ignition. The fabric has a naturally low rate of flame spread and meets the Standard for Flammability of Clothing Textiles CPSC 16 CFR Part 1610.

**Low-linting**
Boundary-SMS gowns are low linting. Because they are made from polypropylene, the gowns are naturally low in lint.

**Four layers of protection**
Our SMS technology utilizes four layers of fabric to provide a high level of fluid repellency. This helps provide a barrier to blood, body fluids and pathogens. The fabric features two densely-packed meltblown layers sandwiched between two strong, spunbond outer layers.

**Breathable and more comfortable than other SMS gowns**
Moisture vapor escapes at nearly twice the rate as other SMS gowns, allowing you to remain more comfortable.
